Speaker 1: If you want to go outside the country, you're already outside the country, get a hold of Antonio Jimenez, Dr. Antonio Jimenez. He's got clinics in Tijuana and in Cancun. And he's been curing for 35 years people all naturally from any cancer on Earth. You've got to consult those individuals.

Speaker 2: And because I know this situation, I know that she was expected at one point, two weeks ago, to be dead in a couple of hours. So I think Julie is saying, what emergency thing would you do, if anything, to help?

speaker 1: Number one, I would slap a seven milligram nicotine patch onto her, and I'm not joking. Then the next thing I would do, you have got to get the book, The One Minute Cure, and you need to start giving her food-grade hydrogen peroxide orally. It is known to cure almost every cancer on Earth, and if you study with me, you'll learn why. Every cancer on Earth is either paracytic or created by venoms, and hydrogen peroxide is a cure for both.

speaker 2: How much hydrogen peroxide? Is that strong? It's food... How much? A teaspoon or what?

Speaker1: Food Grade Hydrogen Peroxide. You can get it at earthharmony. Com. It's 6% food-grade hydrogen peroxide. We actually helped develop that to make sure it was clean, pure, non-toxic. You take that and you actually only put three to four drops in 6 to 8 ounces of water. Then you drink that. Upwards of 20 drops. You work up on the drops. You start on day one with three and you drink it. In the book, The One Minute Cure, there's over 100 people who cured every single cancer on Earth, and they were told it was terminal, they would die, and they used hydrogen peroxide to do it.
